

**ENFORCEMENT OF THE
ENVIRONMENTAL PROTECTION AND
ENHANCEMENT ACT
1 January 2000 – 31 December 2000**

January 2001
Enforcement and Monitoring Division
Alberta Environment

PURPOSE OF THIS REPORT

This report provides an overview of the enforcement of Alberta's Environmental Protection and Enhancement Act (EPEA) for the calendar year ending December 31, 2000. Even though a number of agencies are responsible for enforcing some aspect of EPEA, overall direction of the enforcement program for EPEA rests with Alberta Environment's Enforcement and Monitoring Division.

The mandate of the Enforcement and Monitoring Division is to ensure firm and fair enforcement of the EPEA in a timely and consistent manner. This mandate is fulfilled by the regional investigation of environmental concerns and incidents and, when these concerns and incidents warrant it, enforcement action is taken. Decisions to take enforcement action are made by the Regional Enforcement and Monitoring Managers.

This report is the latest in the series summarizing enforcement activities since the enactment of EPEA. The following are also available:

- Enforcement of EPEA: 1 April 1999 to 31 March 2000
- Enforcement of EPEA: 1 January 1999 to 31 December 1999
- Enforcement of EPEA: 1 April 1998 to 31 March 1999
- Enforcement of EPEA: 1 April 1997 to 31 March 1998
- Enforcement of EPEA: 1 January to 31 December 1997
- Enforcement of EPEA: 1 January to 31 December 1996
- Enforcement of EPEA: 1 September 1993 to 31 December 1995

Marvan Transport (1994) Ltd.	EPO Red Deer -SW-3-39-27-4	16-Feb-00	AEPEA 102(1)	The Company operates a business for the transport of oilfield products and wastes, near Red Deer, Alberta. On or about 31 October 1999 an employee of the company was transferring hydrochloric acid from one of the Company's tanker trucks to one of the Company's storage tanks, when a valve on the storage tank failed causing the hydrochloric acid to spill onto and contaminate the soil. The contaminated soil had been transported to another property and had been placed on a polyvinyl sheet and surrounded by earthen containment berms. The contaminated soil was stored in a manner which may cause a substance to be released to the environment and may cause an adverse effect on the environment. The company shall take immediate steps to prevent a release to the environment of substances from the contaminated soil which may cause an adverse effect on the environment. The company shall submit a written Remedial Plan to the Manager by 23 February 2000, the Schedule of Implementation shall ensure that all activities under the Remedial Plan must be completed by 3 March 2000. No later than 5 days after the completion of the Remedial Plan, the company shall submit a written status report to the Manager setting out the steps that the company undertook to comply with the Remedial Plan. Order complied with and file closed 27 April 2000.

Mohawk Canada Limited	EPO Edmonton Plan 3100TR, Block 30, Lot 126	13-Oct-00	AEPEA 102(1)	The company operated a gasoline service station. In November of 1996 an Environmental Site Assessment was conducted to determine the presence or absence of petroleum hydrocarbon contaminated soil at the site. The results report confirmed the presence of petroleum hydrocarbon contaminated soil at the site. The company ceased operating the gasoline service station on 1 July 1997. The company commenced operation of the soil vapour extraction on 30 January 1997. An Environmental Site Assessment Report dated October 1999 confirmed the presence of hydrocarbons on the lands adjacent to the site. On 12 June 2000 the company submitted their remediation plan for the clean up and on 14 June 2000 the plan was approved. Within 7 days of receipt of this Order the company shall submit to the Manager a Schedule of Implementation for the work outlined in the plan. The company shall implement the work set out in the plan in accordance with the schedule. The company shall delineate the extent of the off-site contamination of the soil, surface water and groundwater. The company shall submit a written report to the Manager by 5:00 p.m. every Thursday unless otherwise advised in writing by the Manager. The company shall submit a final written report signed by a qualified environmental consultant confirming that the work has been completed in compliance with the Order within 45 days of the completion of the work, outlining all the activities undertaken and the results achieved.

EPO Calgary Plan 2846GW, Block 5, Lot 39-40	02-Nov-00	AEPEA 102(1)	When the company leased or owned the property, there was a gas station for the sale of hydrocarbon petroleum products on the site. There were Phase I and Phase II environmental site assessments completed in October and November of 1998. Contamination was detected in additional soil samples taken on 25 November 1998. As of 18 October 2000, the company has not investigated the extent of the contamination under the property, or whether any contamination has migrated off the property. The company shall submit an investigative plan (which will include an investigative report and remediation plan) and implement the work set out in the investigative plan and remediation plan. The company shall submit written status reports within 7 days of completion of the remediation, the company shall submit a final report detailing the remedial work undertaken at the site, and independent confirmation from a qualified environmental consultant that the soil and groundwater meets the criteria. Appeal received 6 November 2000 by the Alberta Environmental Appeal Board.
